

Give your buyers another reason to get excited about your homes with the LightNex Connected Home Program!

LightNex Connected Home Program

Today's home is expected to support entertainment systems, home offices, the internet, multiple telephone lines and digital tv for the tech savvy consumer. Builders who satisfy this demand will **stand out from the competition** and realize faster sales and greater profits.

Through the LightNex Connected Home program, you can insure this capability and showcase the most advanced communication and entertainment services available in Bozeman.

LightNex is bringing Bozeman exciting new options for voice, data and video connections through a state-of-the art fiber optic network. This fiber optic network can deliver information hundreds of times faster than DSL, cable modem or wireless technologies. Fiber optics will satisfy new communications and entertainment bandwidth needs for the next thirty years.

The goal of the LightNex Connected Home Program is to integrate these advanced fiber optic services with the necessary structured wiring technology to deliver a powerful marketing tool for your new homes.

As a partner in the LightNex Communications Connected Home Program, we will provide you the following:

- Marketing Materials and Signage Promoting the Technology Features and Capabilities Available in Your Home.
- Structured Wiring Components at a Deeply Discounted Price Which Includes:
Structured Media Enclosure
Cables for Communications (CAT-5) and Video (RG-6)
Wall Plates/ Multimedia Ports
Installation Tools
- Free Structured Wiring Installation Training
- Ongoing Technical and Marketing Support.

**Superior Technology for the Builder.
Added Value for the Buyer.
It's a Win/Win Situation.**
